

Year 6 Snow Pack When you have finished having lots of fun in the snow, have a go at some of these activities.

Write a set of acrostic poems for words related to this type of weather.

E.g. snow, icicles, snowman

S
N
O
W

Write a story with the title "The Ice Palace".

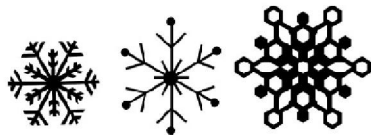

Write a mini toolkit before you start to make sure you remember all the high level features that you would use in class.

Find out about an animal that lives in a snowy habitat. Make a fact sheet about it.

Draw a snowflake or find a picture on the

Investigate different types of angles and lines of symmetry that you can see.

Write your own word problems based on the weather.

You can bring these into school to try them out on the rest of us. (You must know the answer!)

Be a snow mathematician...

- Measure the snow. How deep is it in cm?
- How much does a snowball weigh? Use grams and Kilograms.
- Put the snowball in a container, estimate how much liquid there will be when it has melted. Measure in millilitres and litres.

Make a snowman out of snow. Draw a picture of your creation. Label your picture with amazing descriptive language.

Or

Make a model of a 3D snowman. You could use clay, junk modelling materials, paper and card.

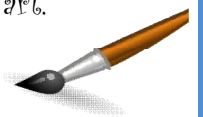

Find a biscuit recipe. Make the biscuits. Can you make the shape of the biscuits link to the weather?

Enjoy with nice hot drink! (Don't forget to save one for us!)

Can you scale the recipe up or down to make it for a different number of people?

Create a piece of snow art.

It could be...

- A collage - using old magazines and comics
- A painting
- A really detailed observational drawing
